***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Heidorn et al. (Patent # 5,966,686).

Regarding claims 1, 5, 6, 8-10, Heidorn et al. teaches the claimed invention of a method for analyzing text in a natural language (See abstract, lines 1-2) comprising:

Constructing a hierarchical tree representing a text in a natural language; (See col. 2, lines 11-13) and

Applying a reduce rule to the hierarchical tree, the rule applicable only to an instance of a pre-determined sub-hierarchy of the hierarchical tree (See col. 3, lines 49-col. 4, lines 18, wherein Heidorn et al. teaches applying rule to leaf nodes only or to pairs of leaf nodes only, which is equivalent to claimed instance of a predetermined sub-hierarchy). It is inherent that the data is associated with each node.

Regarding claims 2, 3, 4, Heidorn et al. teaches the claimed invention of specifying predetermined sub-hierarchy as a path through the hierarchical tree

(See col. 3, lines 49-col. 4, lines 18, Wherein Heidorn et al. teaches a leaf node and root node which is equivalent to claimed sub-hierarchy.

Regarding claim 7, Heidorn et al. teaches the claimed invention of a CPU and data store as described in col. 8, lines 1-5.
